The graduate plans the management of financial entities applying the corresponding tax and legal framework.

It is expected that the graduate of the Master's Degree in Finance demonstrates a conduct based on ethical principles and values, honesty and commitment to society to contribute to the development of capital markets.

GRADUATION

Program Learning Outcomes

In every semester, the program provides assessment results according to its Multiannual Assessment Plan (MAP), which typically considers one or more of its program learning outcomes (PLOs). Most programs utilize the platform Brightspace to collect and assess student work and to present the data and evidence of student achievement. These results and their analysis, with the objective of identifying areas for improvement, are presented in the program's annual assessment report.

In the graphic below, the most recent period in which a PLO has been assessed is indicated, with the percentage indicating achievement of the expected performance standard for that PLO, according to the rubric used to evaluate the student work. This standard can be designated at an introductory, intermediate, or final level, depending upon how the course learning outcomes (CLOs) align to each PLO in the program's curriculum map.

A graduate of the Master in Finance will be able to:

1. Apply financial theories and models to make investment and organizational financing decisions.
2. Use up-to-date financial techniques and instruments for the operation of the stock market and banking.
3. Use selection and valuation techniques of fixed and variable income instruments in the design of project financing strategies.
4. Design investment portfolios to satisfy the financing needs of organizations based on national and international norms and standards.
5. Plan the management of financial entities in compliance with the corresponding tax and legal framework.
