It is expected that the graduate will exercise leadership, integrity and commitment to society when solving complex organizational problems. Finally, the graduate is expected to be committed to continuing education to remain at the forefront of business.

GRADUATION

Program Learning Outcomes

In every semester, the program provides assessment results according to its Multiannual Assessment Plan (MAP), which typically considers one or more of its program learning outcomes (PLOs). Most programs utilize the platform Brightspace to collect and assess student work and to present the data and evidence of student achievement. These results and their analysis, with the objective of identifying areas for improvement, are presented in the program's annual assessment report.

In the graphic below, the most recent period in which a PLO has been assessed is indicated, with the percentage indicating achievement of the expected performance standard for that PLO, according to the rubric used to evaluate the student work. This standard can be designated at an introductory, intermediate, or final level, depending upon how the course learning outcomes (CLOs) align to each PLO in the program's curriculum map.

A graduate of the Master in Project Management will be able to:

1. Manages projects in organizations in accordance with the Project Management Institute (PMI) methods.
2. Develops projects, programs and portfolios, integrating human talent, information systems, and corporate social responsibility (CSR).
3. Evaluates the demands and opposing variables that impact the field of project management, analyzing concurrent and interdependent factors of projects.
4. Directs participatory projects within an area of specialization, considering the sustained and sustainable development of the environment.
5. Evaluates projects applying the Project Management Institute (PMI) methodology to provide possible solutions for the problems of small, medium, and large enterprises.
